-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 103

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(c) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 9, 22-28, 33, 35-36, 52-54 and 56 are rejected under 35 U.S.C. 102(c) as being anticipated by Turner (US 2003/0152044).

1. Regarding claims 1, 9, 22-28, 33, 35-36, 52-54 and 56, Turner discloses a flow control method for use in a wireless communication network (fig. 2) wherein a PCN (item 30) supports data connections with one or more mobile stations and wherein the PCN transfers data as needed to a RAN (item 20a) for delivery to the mobiles stations. The method comprises receiving a flow control on message at the PCN from the RAN indicating that flow control should be turned on for a mobile station (para. 39; note: pause command from the mobile station is transmitted to the PSDN) to suspend packet data transfers, receiving a flow control off message to resume data transfers (para. 39).

Claims 1, 5-11, 17-30, 34-44 and 48-65 are rejected under 35 U.S.C. 102(c) as being anticipated by Willey et al. (US 2005/0174939).

2. Regarding claims 1, 5-11, 17-30, 34-44 and 48-65, Willey discloses a flow control method for use in a wireless communication network (fig. 1) wherein a PCN supports data connections with one or more mobile stations and wherein the PCN transfers data as needed to a RAN (item 20a) for delivery to the mobiles stations. The method comprises receiving a flow

control on message at the PCN from the RAN indicating that flow control should be turned on for a mobile station (para. 18) to suspend packet data transfers, receiving a flow control off message to resume data transfers (para. 18). The RAN includes a PCF to determine flow control (para. 18).

Allowable Subject Matter

Claims 2-4, 12-16, 31-32, 45-47 and 66 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
